

Dear Sir or Madam,

I am writing to apply for the Developer position in the Optimization and Quantum team at SAP. With a strong background in software engineering, mathematical modeling, and quantum computing, I am excited about the opportunity to contribute to SAP's mission of building high-performance, future-ready optimization solutions.

I hold a Bachelor's degree in Computer Science and Software Engineering and am currently completing a Master's degree in Mathematics. In my current role as a Quantum Software Engineer at QC Design, I develop high-performance C++ and Python algorithms for simulating complex noise models in quantum systems, achieving significant performance improvements and scalable architectures. This work has strengthened my skills in algorithm design, system optimization, and cloud-ready development.

Previously, as Co-founder and CTO of a high-traffic AI platform, I led the full technical development, including cloud infrastructure, CI/CD pipelines, Docker-based deployment, and scalable backend systems. This experience has given me strong ownership of end-to-end deliverables, from architecture and implementation to production support and continuous improvement.

I am particularly motivated by SAP's long-term vision to become quantum-native and by your team's focus on industrial-grade optimization engines. My experience in C++, Python, cloud technologies, DevOps practices, and research-driven development aligns well with your requirements. I enjoy working in interdisciplinary teams, maintaining high code quality standards, and continuously expanding my technical expertise.

I am eager to contribute my skills in optimization, performance engineering, and quantum technologies to help deliver reliable, innovative solutions for SAP's global customers. I would welcome the opportunity to further discuss how I can add value to your team.

Thank you for your time and consideration.

Yours truly,

Ivan Ogloblin
